2009	7.13%	7.32%	\$70,279	\$44,676,575	-0.17%
2010	6.00%	6.14%	\$74,591	\$46,011,097	2.99%
Average annual return	9.85%	10.20%			
Total dividend income on \$25,000 invested Oct 1, 1999	\$27,673.42	\$49,591.12			

NOTES:

1999 - the first shares were issued in September 1999

2002/2003 yield- affected primarily due to a large increase in investments, combined with delays in completing new mortgage fundings.

2009 yield - affected by *significant* idle cash in the 3rd and 4th quarters from unprecedented payouts which followed several months of inactivity in the real estate market. This watered down the return significantly. There was an increase to the allowance for bad debts.
